Passionate about technology and web development, I discovered my true calling as a programmer during my studies in Cybersecurity. Since then, I have **turned technical challenges into practical solutions**, contributing to diverse projects ranging from modernizing legacy systems to building scalable and secure web platforms.

With over **three years of experience**, I have worked at a leading distance learning company, where I developed systems that significantly enhanced the performance, security, and accessibility of both internal and external services. Currently, I focus on delivering end-to-end solutions using a broad range of technologies, combining **C#, .NET, Node.js/TypeScript, Angular, React, and cloud and hosting platforms like AWS, Railway, and containerization with Docker**.

Driven by innovation and continuous learning, I am always seeking to refine my ability to **deliver impactful software that makes a difference for businesses and users alike**.

Professional Experience

FullStack Developer

Freelancer

10/2023 - present | 1 year and 3 months

Working as a freelancer has provided the opportunity to engage directly with clients and solve real-world problems within tight deadlines.

- Participate in all stages of the process, from planning to delivery, using C#, .NET, Node.js, TypeScript, React, Angular, and other technologies.
- Develop and maintain proprietary and third-party systems, delivering scalable and functional solutions.
- Implementation of automation and infrastructure optimizations for servers and cloud environments, ensuring performance and reliability.

Web Developer

Metropolitan Educação LTDA

01/2023 - 04/2024 | 1 year and 4 months

My work was characterized by a constant focus on improving performance, usability, and security in critical systems developed with PHP and Node.js.

- Refactored legacy PHP and Node.js applications, achieving up to a 25% reduction in loading times.
- Actively contributed to migrating monolithic systems to modern architectures using Next.js and GraphQL, enhancing user and developer experience, as well as system reliability.
- Developed dynamic SEO solutions for blogs and e-commerce platforms, boosting rankings and conversions in search engines.
- Created a modular template based on Next.js, GraphQL, and Redis, widely adopted by other teams to accelerate new project development.
- Strengthened authentication and authorization with RBAC standards, ensuring security in administrative systems.

Education

Universidade Anhanguera

Cybersecurity Associate Degree - 2021/2023

It was during my studies that I discovered my passion for programming, in a programming languages course that changed both my professional and personal trajectory.

Additionally, I chose elective courses from the "Career Path" track, such as:

- Argumentation and Discourse Analysis;
- Data Analysis with Python;
- Essential and Advanced English;
- Coaching and Leadership;
- Business Communication and Social Media.

Hard Skills

- **Frontend:** Angular, React, Next.js, TailwindCSS, StyledComponents, Astro.
- **Backend:** C#, .NET, Node.js, TypeScript, NestJS, Express, Fastify.
- **Databases:** PostgreSQL, MySQL, MongoDB.
- **Infrastructure:** AWS, Docker, Redis.
- Other tools: Git, PHP, Python.

Soft Skills

- Adaptable and Creative
- Communicative
- Self-managed
- Team player
- Problem-solving
- Resilient and Self-taught
- Innovative and open to change

Languages

- **English** - Fluent
- **Brazilian Portuguese** - Native
